

Tomorrow's energy world with RAG

Gaseous Energy Sources:

- CH₄ CH₄ Natural Gas
- CH₄ Biogas / Bio-Methane
- H₂ Hydrogen from pyrolysis
- H₂ Hydrogen from electrolysis
- CO₂ Carbon Dioxide from biomass or industrial process

Applications:

- CH₄ CH₄ Use for electricity and heat
- H₂ H₂ Hydrogen in transport network and industry
- CH₄ Green Gas for mobility
- H₂ H₂ Hydrogen for industry, mobility and heat
- C Carbon from pyrolysis
